No. 1. Population of New South Wales: Annual Estimates

Note. For periods between censuses of population, the population of the State is estimated by adding the subsequent natural increase (the excess of births over deaths) and recorded net migration (the excess of arrivals over departures) to the population ascertained at the previous census. The intercensal estimates are subject to revision when the population is ascertained at the next census, and any discrepancy disclosed by the census is added to the recorded net migration. Population estimates for periods between the 1954 and 1961 censuses have been revised in the light of preliminary results of the 1961 census.

No. 8. Wage and Salary Earners in Civilian Employment in N.S.W. Government and Private

(Excluding Rural Workers, Females in Private Domestic Service, and Defence Forces)

Notes.

1. The estimates of employment given in Tables 8 and 9 are derived from three main sources:—

- (a) monthly employment in factories, as recorded in the annual factory censuses;
- (b) monthly returns from governmental authorities; and
- (c) monthly returns supplied by employers for purposes of Commonwealth pay-roll taxation.

These are supplemented by some other direct records of monthly employment (e.g. hospitals) and by estimates of the number of employees outside the scope of the main sources. The numbers of factory employees shown for months subsequent to June, 1961 are estimates which are subject to revision in the light of the results of the factory censuses for 1961-62 and later years.

2. Workers in rural industry, females in private domestic service, members of the full-time defence forces at home or abroad, and National Service Trainees in camp are excluded.

3. The estimates are designed to measure monthly trends in employment in the defined field. They are compiled on an establishment or enterprise basis and therefore do not cover exactly the same area of industry as the industry tabulations compiled on the occasion of a population census from the schedules provided by individuals.

* Relates to industrial disputes involving a stoppage of work for a minimum of 10 mandays. The figures include the time lost by employees who worked in establishments where stoppages occurred but were not themselves parties to the disputes; they exclude the time lost, as a result of the disputes, by employees in other establishments.

† Includes a small number of mandays lost in the shipping industry.

Note. Tables 12 and 13 are based upon the records of the Commonwealth Meteorologist. The divisions correspond approximately with the statistical divisions shown on the map in frontispiece of the Official Year Book of New South Wales, each division being subdivided into two sectors indicated by the letters N, S, E, or W according as they constitute the northern, southern, eastern, or western portion of the division concerned. Normal Rainfall is based on a period ended 1929.

* The value added to raw materials by the process of manufacture. It is calculated by deducting from the value of output (which is, in general, the value of goods manufactured) the value of materials and of fuel and power used. Value of production comprises salaries and wages, drawings by working proprietors, depreciation, insurances, selling expenses and other overheads, taxation, and profit.

BUILDING

Notes:—

1. "Value" represents the estimated cost of the building when completed (exclusive of the land).
2. Building is classified as "government" or "private" according to ownership.
3. The value of building approved is, for private building, the value of permits issued by local government authorities to build in that part of the State (covering all municipalities and the larger residential areas within shires) subject to building control by local authorities; and for government building, the value of contracts let or work commenced and day labour projects authorised by governmental authorities.
4. The number of houses and flats approved is, for private building, the number covered by local authority permits to build; and for government building, the number covered by contracts let and day labour jobs authorised by governmental authorities.
5. Some building in rural areas is excluded.

No. 73. Index of Prices of Shares on Sydney Stock Exchange

This index relates to ordinary shares of the principal companies (excluding banking companies) listed on the Sydney Stock Exchange whose business in New South Wales is extensive.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 34 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

No. 74. New Money Capital Raised by Australian Companies

These statistics relate to new capital raised by companies incorporated in Australia and the Australian Territories, distinguishing between companies listed on the Australian Stock Exchanges (*listed companies*) and all other companies (*unlisted companies*). *New money raised* is the net amount of cash transferred from the investing public to the companies, and consists of the total amount of cash received by the companies less the amounts not involving a transfer of funds from the investing public (cash subscribed by associated companies, and other cash subscriptions used to redeem shares, debentures, etc. or to purchase existing shares, debentures, etc. in other companies). Borrowings by bank overdraft and temporary advances, deposits accepted by banks, insurance and pastoral companies, and building societies, and loans to authorised dealers in the short-term money market are excluded from the statistics. Figures for 1959-60 and later periods have been revised since last issue.

† Allowances are payable for the wives and the dependent children under 16 years of age of those pensioners who are invalids: since October 1961, the maximum weekly amounts have been 47s. 6d. for wife, 15s. for the first child, and 10s. for each other child. Since October, 1958, supplementary assistance of 10s. per week has been available to single pensioners and to married couples where one is a pensioner and the other is not receiving a wife's allowance; only those who pay rent and are considered to be entirely dependent on their pension are eligible for this assistance. Pensioners in benevolent asylums receive allowance instead of pension; since October, 1961, the maximum rate has been 37s. 6d. per week.

‡ Includes (a) payments to benevolent asylums and hospitals for maintenance of pensioners (£116,000 in 1960-61) and (b) payments for wives and children of pensioners who are invalids.

¶ Includes a small number of pensioners in benevolent asylums not classified as "Age" or "Invalid" pensioners.

No. 99. Weighted Average Minimum Weekly Wage Rates, New South Wales

- Notes. 1. The indexes of minimum wage rates embrace a representative range of occupations and are based on the occupation and industry structures in 1954. The wage rates used in the indexes are the rates payable for a full week's work (excluding overtime), as prescribed in the relevant industrial awards, determinations, and agreements. The rural industries are excluded from the indexes.
2. The money amounts shown should not be regarded as actual current averages, but as an index of changes expressed in money terms.

* For State Awards, the amounts shown to February, 1959, represent the basic wage together with so much of any margin and any further amount necessary to make the minimum wage payable equivalent to 75 per cent. of the basic wage for males. Following the increase in the basic wage to the 75 per cent. equivalent, the amount shown from February, 1959, is the basic wage exclusive of any margin. This change was applied in State Awards from different dates, beginning in March, 1959.

† Quarterly adjustments for movements in retail prices were discontinued in September, 1953, in both Commonwealth and State Awards. They were restored in State Awards in November, 1955.

No. 101. Consumer Price Index

Notes:—

- For current statistical purposes, the Consumer Price Index replaces both the "C" Series Retail Price Index (first compiled in 1921) and the Interim Retail Price Index (constructed as a transitional index in 1954).
- The Consumer Price Index measures variations in prices of commodities and services as affecting a high proportion of the expenditure of wage earner households. Changes in the pattern of the expenditure since 1950 have been reflected in the Index by the introduction of additional items and altered weighting patterns. The new Index is more comprehensive than the earlier indexes.

No. 102. Wholesale Price (Basic Materials and Foodstuffs) Index

Commodities are priced in their primary or basic form wherever possible. Prices are drawn mainly from Melbourne sources. Apart from locally produced building materials, and one or two minor commodities, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets.

No. 103. Export Price Index, Australia

Compiled from prices of twenty commodities which normally constitute about 80 per cent. of all Australian exports. The prices are weighted by the average annual exports (production in the case of gold) in the years 1933-34 to 1935-36.
